### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Brett Bornsen on 10/12/2004.

The application has been amended as follows:

#### **In the claims**

108. A communication system, comprising:

a plurality of signaling processors, wherein each of the signaling processors includes a call processing table and each of the signaling processors is configured to receive signaling for a call, process the signaling based on the call processing table to select an identifier for routing the call, and transmit a control message identifying the identifier;

a plurality of connection systems, wherein each of the connection systems is configured to receive user communications for a call, receive a control message that includes an identifier for routing the call, interwork the user communications based on the identifier in the control message to control the point of interworking, and transmit the user communications that include the identifier for routing the call; and

a call processing control system coupled to the signaling processors and configured to receive call processing data from the signaling processors, process the call processing data to generate updated call processing tables, and transmit the updated call processing tables to the signaling processors to remotely control call processing.

118. A method of operating a communication system comprising a plurality of signaling processors, a plurality of connection systems, and a call processing control system, the method comprising:

in each of the signaling processors, receiving signaling for a call, processing the signaling based on the call processing table to select an identifier for routing the call, and transmitting a control message identifying the identifier;

in each of the connection systems, receiving user communications for a call, receiving a control message that includes an identifier for routing the call, interworking the user communications based on the identifier in the control message to control the point of interworking, and transmitting the user communications that include the identifier for routing the call; and

in the call processing control system, receiving call processing data from the signaling processors, processing the call processing data to generate updated call processing tables, and transmitting the updated call processing tables to the signaling processors to remotely control call processing.

***Allowable Subject Matter***

2. Claims 108-127 renumbered as 1 – 20 are allowed.
3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
